Additional Comments and Notes

Code A: (should work).

SUITABILITY CODE: Soil series should have ability to function as suitable absorption field with proper design, installation, and maintenance.

*Cut and/or fill of acceptable soils voids this report.

*Boundaries and borings are located from ground measurements taken from readings by a Trimble PRO XRS GPS and slope readings are from a Suunto Clinometer. Holes are marked by survey ribbon or wire flags.

*Please note that all findings reported are based on professional opinion and do not imply approval or disapproval for permitting. Decisions and permitting is the responsibility of the local environmental health department.

*Due to the variances in natural soil conditions and effects of uncontrolled construction practices, a positive report does not guarantee the future performance of septic system.
